To Whom it May Concern:

We have had the privilege of working with Clean Vibes, LLC for several years at the Forecastle Festival, a major music festival that takes place in Louisville, Kentucky's Waterfront Park. It is our sincere pleasure to recommend Clean Vibes to you in the strongest possible terms.

Louisville Waterfront Park is an 85 acre reclaimed green space at the edge of the Ohio River in downtown Louisville, Kentucky, and we host over 150 events per year. We have been recognized by the Urban Land Institute as one of the Top 10 Parks in the Nation, have received the Rudy Bruner Silver Award for Urban Excellence, and the Phoenix Award from the Environmental Protection Agency among many other accolades. Park Maintenance is a very serious business for us, as our space is a former abandoned industrial wasteland. Without question, Anna Borofsky and her team at Clean Vibes perform event clean up in the most competent and environmentally responsible manner ever demonstrated in our 25 year history.

Clean Vibes answers a real need for major events producers and has set the bar for the best practice in waste diversion at events in Kentucky. Over a weekend of 60,000 plus attendees for a major music festival, Clean Vibes trains the general public to sort and dispose of landfill, compost and recycling at this major event. The amount of recycling and compost that they are able to divert from the landfill is staggering. This is not only best practice for the industry, it is a meaningful educational experience for those that attend.

Anna and her team have a wonderful rapport with everyone from Solid Waste administrators of Metro Government to the dumpster delivery drivers, staff and volunteers who assist with this yeoman's effort.

We are so proud to host Clean Vibes and brag about what they are able to accomplish in our community. Their work is important to us, important for the special events industry and important to our environment. They leave our park better than they found it and have begun to revolutionize the way that we view waste disposal for a public facility and for special events.

Best regards,
